

What-If Model: Gasoline Price -> Predicted Milk Price

Model: linear regression of Gasoline (unleaded regular, x) against Milk, fresh whole (y) across 139 months

, fit with SLOPE/INTERCEPT

Regression Statistics

Slope	0.4950
Intercept	2.0919
R-squared	0.5891
Actual avg Gasoline price	2.9617
Actual avg Milk price	3.5569

Live What-If Lever

Hypothetical Gasoline Price (\$/gal):	3.5
Predicted Milk Price (\$/gal):	3.824

Sensitivity Table — Predicted Milk Price by Gasoline scenario

Gasoline scenario (\$/gal)	Predicted Milk Price
2	3.082
2.5	3.329
3	3.577
3.5	3.824
4	4.072
4.5	4.319
5	4.567
5.5	4.814
